DETAILED ACTION

Specification

The disclosure is objected to because of the following informalities: The term "wrap" found throughout the specification should be "warp". Appropriate correction is required.

Claim Objections

Claims 1-5 are objected to because of the following informalities: As set forth above the term "wrap" should be "warp". Also, claim 1, includes reference characters which are not enclosed within parentheses. Reference characters corresponding to elements recited in the detailed description of the drawings and used in conjunction with the recitation of the same element or group of elements in the claims should be enclosed within parentheses so as to avoid confusion with other numbers or characters which may appear in the claims. See MPEP § 608.01(m). Appropriate correction is required.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-5 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The recitation "to be" makes the claim unclear. Is applicant claiming specific structure or a future act of use? Additionally, in claim 1, line 9, the phrase "or more or not be" has no clear and definite meaning as to the number of superimposed yarns.

Art Unit: 3765

Allowable Subject Matter

Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action.

Claims 2-5 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
